PROBLEM STATEMENTS

AViCA™ is an integrated digital health platform which enables continuum of care for patients and providers

App as a Prescription

Empower – Monitor – Treat Patients 24/7

Medical Device Integration

Captures real-time patient health data by integrating with connected digital monitoring devices.

Remote Patient Monitoring

Tracks patient health data remotely, giving providers timely insights for proactive care.

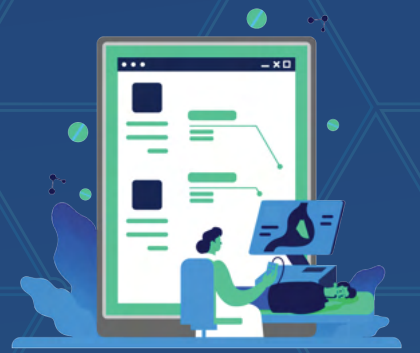

Patient Engagement & Communication

Secure chat, email, and alerts connect patients, providers, and care teams; boosting engagement and collaboration.

Patient Education & Empowerment

Curated resources and self-care guidance help patients understand their condition and stay engaged in their care.

Personal Health Record

Gives patients anytime access to their health history, labs, and medications; reducing unnecessary tests and duplication.

Treatment Compliance

Medication reminders and adherence tracking improve outcomes and reduce risk of non-compliance.

Telemedicine

Real-time video consultations connect patients to care and diagnosis from anywhere.

Data Analytics & Notification

Runs health data through analytics to surface insights and trigger timely alerts for patients and providers.

Value Proposition

Application as a Prescription

Automated Data Collection

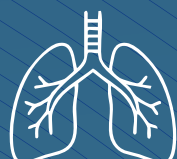

Data Analytics

Digital Therapeutic (DTx) Components

AViCardia

Cardiovascular Wellness

AViRespira

Respiratory Wellness

AViDiabeta

Diabetes Wellness

AViMaterna

Maternal & Child Wellness

AViCardia is a Digital Therapeutic (DTx) Component of AViCA platform, focusing on continuum of care & remote monitoring for cardiovascular patients through wearable devices.

VIVALINK

FDA-cleared continuous ECG monitoring wearable patch

Device Features

Waterproof

Rechargeable

Cardiac Events Detection

Reusable

Compact, Lightweight, and Discreet Design

Detailed ECG Reports for Clinical Review

Activity Compatible, Designed for Daily Use

Secure Cloud-Based Data Upload

Value Proposition

Extended Holter Monitoring for 7-30 Days

FDA Cleared Device & Algorithms

Key Parameters Monitored

ECG Rhythm

Respiratory Rate

Heart Rate

Skin Temperature

Heart Rate Variability (HRV)

Step Count & Physical Activity

3-Axis Motion & Activity Data

Posture

FOUNDERS

NAVEED ALAMN

Founder & Chief Executive Officer

I believe in enabling access to healthcare and treatment for all through digital technology integration in our care pathway. I have more than 20 years of experience in bio-medical device industry and specifically in microelectronics technology development. I have also contributed to Technology development programs at DARPA as a consultant, where I had the privilege to contribute to many programs in Microelectronics and biological technology offices. I have contributed to designing and leading multiple efforts for electronics design for implantable pacemakers, drug pumps and loop recorders. I bring the same passion and drive to innovate at Aman Ventures to develop highest quality digital healthcare solutions that will provide connected pathway for physician and patients to improve care delivery and patient outcomes.

DR. ZAKIUDDIN AHMED
